Motto

ArabLingo || Redefining How We Understand Learning Differences

Sub-Motto

Building inclusive communities where every child is understood and supported

Early Screening does

1. Stronger Social Skills & Confidence
Early identification and support help children build friendships, communicate effectively, and feel included, reducing social isolation and promoting emotional well-being.

2. Improved Academic Performance
Children who receive early support are less likely to struggle with reading, spelling, or math, participate more actively in class, and achieve better learning outcomes.

3. Timely, Personalized Intervention
Screening allows for tailored therapy and educational plans, ensuring children receive the right support at the right time — setting them up for long-term success.

What a Better Recess Does

Conflict Resolution

Recess doesn't have to be chaotic. At a better recess, kids acquire tools to work out disagreements and differences.

Leadership Skills

When they're playing amongst their peers, kids have a valuable opportunity to develop a sense of fairness, confidence, and communication.

Academic Success

Kids who are engaged during recess are more likely to participate in class, which means better attendance and better grades.

What We Do

ArabLingo supports children with language and learning differences through **early screening, awareness, and accessible educational support**, with a focus on Arabic-speaking communities.

Learn more (About section)

According to Researchers

6.4% of Egyptian preschoolers show developmental delays including language challenges.

11.3% of elementary students show dyslexia, making reading and learning more challenging without early support.

1% of Egyptian primary students experience persistent stuttering, impacting communication and confidence.

Integrating AI and Technology in Early Screening

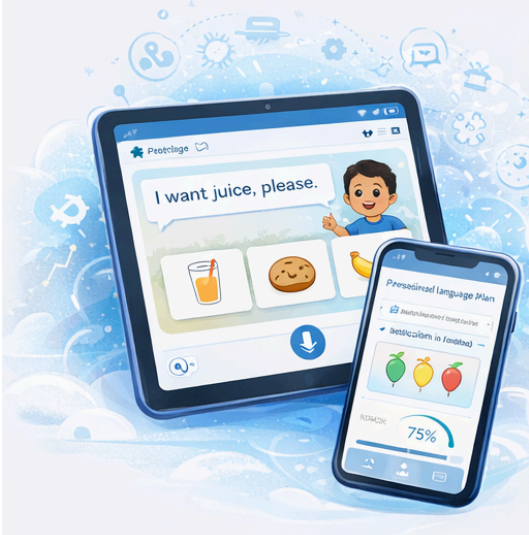

Smart Screening, Personalized Support

ArabLingo leverages artificial intelligence and modern technology to make early identification of language and learning differences fast, accurate and accessible.

How ArabLingo Works

Easy Screening

Children complete interactive, engaging activities through the app – no complicated tests required.

Instant Analysis

AI algorithms evaluate language use, comprehension, and communication patterns in real-time.

Personalized Plan

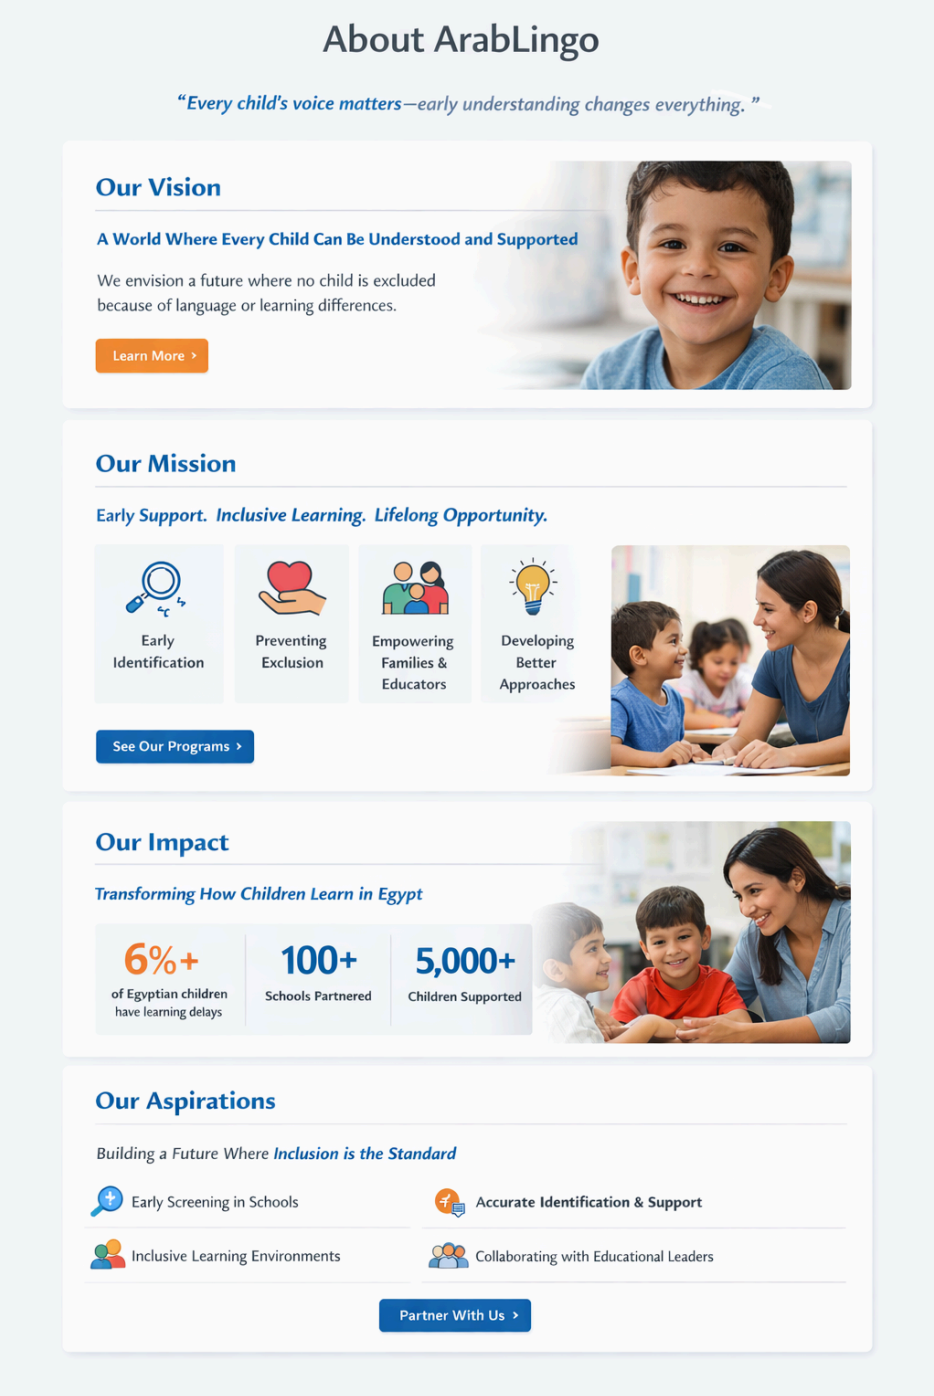

Based on the results, the system recommends therapy exercises, educational content, and interventions tailored to each child.

Ongoing Monitoring

Teachers and parents can track progress, adjust interventions, and receive regular reports to ensure continuous support.

About section

فكك من الكلام هكتبلك اللي will be written تحت بس دي حاجة زي تخيليه لل about انت هتعملها احسن

Our Aspirations

Partnering with schools to ensure every child is understood.

ArabLingo aims to collaborate closely with the Egyptian Ministry of Education to integrate early language screening into elementary schools nationwide. By embedding these tools at the start of a child's educational journey, we can:

- Identify language and learning differences early, giving children the support they need before challenges become barriers

- Reduce misdiagnosis and misunderstanding, ensuring interventions are accurate and timely

- Guide children toward personalized educational and therapy plans, tailored to their specific needs

- Help schools adopt proactive, inclusive approaches, creating classrooms where every child can thrive

Through this partnership, ArabLingo envisions a future where no child in Egypt is left behind simply because of language or learning differences.

Our mission

Identify language challenges early, before they limit learning or confidence

Prevent educational exclusion by replacing misunderstanding with informed support

Equip families, educators, and schools with accessible tools and guidance

Advance better, child-centered approaches to language support and intervention

عايزها زي كروت يسطا اللي هو الكلام اللي في الصورة ده مكتوب ادوس على الكرت يظهرلي الكلام ده فاهمني؟
